

## **"The only person who is educated is the one who has learned how to learn and change"**

Today, the role of a school is not only to pursue academic excellence but also to motivate and empower its students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society. At Holy Child Public School, we provide an atmosphere to our students for multifaceted development, where children are encouraged to channelize their potential in the pursuit of excellence. This can only be possible in a holistic, student-centric environment. The talents, skills, and abilities of each student need to be identified, nurtured, and encouraged so that he / she is able to reach greater heights. Students are provided with a platform to think, express, and exhibit their skills, with the teacher being a facilitator.

At HCPS, our approach is child centric encouraging activity based learning and inculcating a scientific temper and a spirit of free enquiry. In our curriculum the student is the primary focus and each child is involved in the learning process. We are providing experiential teaching learning methodology so that it turns learning into combination of classroom study, research and scientific discovery.

In early stages of learning, from pre-primary to classes I-II, we provide theme based learning in which learning of all subjects is woven around a single theme. This provides best learning experience to the learners and helps in creating holistic, well rounded individuals, equipped with skills and values who will be path breakers of tomorrow

Aristotle once said that, "Educating the mind without educating the heart is no education at all." Even as we impart education to match the advancement in technology and globalization, we march our children ahead with ethos of moral values and principles. We endeavour constantly to instil these qualities in our children.
